WORK EXPERIENCE

Codsoft (Online internship) 15-APRIL TO 15-MAY
Web Development
Learning HTML, CSS, and JavaScript has been an exciting adventure, beginning with crafting simple web pages. CSS introduced a world of design possibilities, making layouts beautiful and responsive. JavaScript brought those designs to life with interactive features and dynamic content. Each language built on the last, creating a powerful toolkit for modern web development.

Tech-A-Intern (Online internship) 1-MAY TO 30-MAY
Web Development
Learning HTML, CSS, and JavaScript has been a transformative journey, starting with the basics of structuring web content and designing stylish layouts. Mastering CSS brought creativity to life, enabling responsive and visually appealing designs. JavaScript added interactivity, turning static pages into dynamic, user-friendly experiences. Each step revealed the immense potential of web development, making the learning process both challenging and rewarding.

PROJECTS

E-Parking Challan
- E-Parking Challan" is a comprehensive parking management system facilitating officer enforcement, user compliance, and administrative oversight. It enables officers to identify violations, generate memos, and notify vehicle owners, while users can view and settle memos conveniently.Station admins manage personnel and generate reports, with main admins overseeing system-wide operations and announcements. The project underscores proficiency in full-stack development, user authentication, payment integration, and administrative functionalities.
- Technologies: CSS, MERN STACK

E-commerce
- As a front-end developer specializing in e-commerce, I excel in crafting captivating online shopping experiences. With a keen eye for design and a mastery of HTML, CSS, and JavaScript, I ensure that every aspect of the website is polished and user-friendly. From creating responsive layouts to implementing intuitive navigation, my goal is to optimize the interface for seamless browsing and effortless purchasing. By staying updated on the latest trends and best practices in web development, I strive to deliver engaging and visually appealing e-commerce platforms that delight customers and drive sales.
- Technologies: HTML, CSS, JS
